PRODUCT SPECIFICATION SHEET

PRODUCT NAME: ANTIMICROBIAL

Black Cat ANTI-MICROBIAL Lever-Lock Premium Looped-End Cotton/Rayon/Polyester Blended Wet Mop Head

PRODUCT DESCRIPTION:

This *highly lauderable* looped-end wet mop is constructed of a blend of Cotton, Rayon, and Polyester fibers. The antimicrobial protection is based on the natural antibacterial properties of silver. The yarn is spun with fibers infused with silver nanoparticles. The silver will not wear or wash off. The treatment is not topical and will last for the life of the yarn. Silver is non-leaching, environmentally-friendly, non-toxic, non-allergenic and is completely safe for human contact. Proven effective, stops the growth of destructive microbes that cause odor, discoloration, staining and fiber breakdown. The Cotton yarn withstands the hard chemicals needed to *sanitize* floors. The Lever-Lock head allows the entire mop to be used without scraping or marring furniture or floors. A quick snap attachment keeps the hands from ever touching a soiled mop! The looped ends eliminate frays, prevent tangling, and will not leave lint as is common with cotton yarns. The looped mop also provides wider coverage with each stroke.

APPLICATIONS:

Ideal for foodservice, healthcare and commercial facilities with limited laundering capabilities.

Features:

- Silver particles fight bacteria, mold & mildew
- Environmentally friendly & safe for human contact
- Lever-Lock Quick Change Head
